ABOUT ME

Software Engineering passionate about technology and continuous learning, with experience in Full Stack development, application deployment, and system migration projects. Recognized for being responsible, disciplined, and adaptable, with knowledge of IT project management and certifications in Big Data, DevOps, and mobile application development. Enjoys solving problems, working with modern technologies, and collaborating on projects that create meaningful solutions. Interested in backend development, cloud computing, web applications, and data-driven technologies.

EDUCATION

Universidad tecmilenio las torres

Bachelor's Degree in Software Engineering
2022 - 2026

LUZAC High School

High School Diploma
2019 - 2022

SKILLS

- Problem-solving
- Teamwork
- Strong communication skills
- Quick learner
- Adaptability

SOFTWARE & TOOLS

- React
- Java
- MySQL
- Python
- Github
- Power BI
- Docker
- Spring Boot
- Tableau
- C#
- HTML/CSS
- Microsoft tools
- AWS
- Terraform
- Corretto
- Caas

LANGUAGES

- English – Intermediate Level (B2)
- Spanish – Native Speaker

EXPERIENCE

JOHN DEERE 2025 - July 2026

FULL STACK IT INTERN

- Developed and designed user interfaces for the migration of the Electrical and Environmental Test Database (EETD) from a third-party solution to an in-house application using React, MySQL, Github, Aws, Spring boot and Corretto.
- The application is used to document and manage testing processes for components across different John Deere products.
- Created screens according to user requirements while following FUEL design standards to support and manage different workflows within the application.
- Collaborated with the ISG-ES team under the Scrum methodology, contributing to the development process through teamwork, requirement analysis, and continuous improvement practices.

LA SIBERIA DEL PASEO 2024 - 2025

CUSTOMER SERVICE

Handled customer calls to process orders while providing the necessary assistance and information for accurate order registration. Also supported kitchen operations when needed.

JOVENES UNIDOS POR LA TECNOLOGIA (JUXT) 2023 - 2024

COMMUNITY SERVICE

Supported the creation of technology-related content for middle school students, sharing knowledge through research and the development of intuitive presentation materials.

SCHOOL PROJECT

SPORTS COURT RESERVATION

- Developed a sports court reservation platform called 4Play, contributing to frontend and backend development using Vue, Node.js, Python, and MySQL.
- Participated in deployment and containerization processes using Docker and GitHub for application management and deployment workflows.
- Contributed to the development of a mobile application using Capacitor to support the platform's digital transformation and improve mobile accessibility.
